Spanish — basic

INTERESTS

Video games · Tennis, running, hiking · Piano · History and heritage · Travel

Guillaume Merle

Platform / MLOps Engineer – Azure & Databricks

PROFILE

Platform and MLOps engineer with 5 years of Python development experience. I industrialise data and AI platforms on Azure and Databricks, with a strong focus on robustness, automation and scaling. Comfortable in large enterprises and international teams alike.

EXPERIENCE

Platform / MLOps Engineer – Azure & Databricks

Sep 2024 – present

Covéa Group – SmartIA · Freelance consultant · Niort · hybrid

- Designing and running data and AI platforms on Azure
- Building and maintaining MLOps and DevOps pipelines
- Industrialising data workloads on Databricks
- Technical support and guidance for data and AI teams
- Contributing to architecture decisions, automation and platform best practices

Python Backend Developer

Jul 2023 – Aug 2024

Freelance · Contract via Upwork · Remote

- Built an API Gateway with FastAPI
- Worked daily within an English-speaking team

Contract for Scalexa, on the Full Color Games online casino platform.

Python / Django Developer

Sep 2021 – Jul 2023

Zentux · Permanent · Lencloître, France

- Aerospace: mapping interface for drone-based industrial monitoring (GeoDjango, PostGIS, Leaflet, WebSockets)
- Entrepreneurs' cooperative: maintained and extended a quoting and invoicing platform, REST API for a Vue.js front end
- Retail: open-source translator for orders and invoices following the EDI standard (EDIFACT, PyAS2)
- Git, GitFlow, CI/CD, containers, testing, agile methods, working directly with clients

EDUCATION

Python Application Developer programme

Oct 2019 – Apr 2021

OpenClassrooms · Career change · bachelor's level · Remote

Built and deployed websites with Python, Django and Nginx · Algorithms, search engine, prediction · Chatbot web app using NLP, the Google Maps API and Wikipedia · Technical and functional design (UML)

SIDE PROJECTS

- **Space Defender: Frontier Squadron** — Video game published on Steam (Unity, C#). Made solo; Early Access in May 2025, version 1.0 in September 2026.
- **Petit Vaisseau** — Independent game studio: production, website, press kit, Discord community.
- **La Bouygue** — Django booking and management app for a family holiday house, in production since 2021.
